# A.C.3 International Conference in Municipality of Forlì

ENES-CE Project| FMI – Municipality of Forlì | Ing. Fabrizio Chinaglia

# A.T3.2 ESTABLISHMENT OF A CONSUMER ENERGY GROUP IN THE MUNICIPALITY OF FORLÌ

## D.T3.2.1 Workshops for citizens and stakeholder

D.T3.2.1 Workshops have been held with private citizens to discuss how energy efficiency in apartments and individual effort can contribute to the implementation of the SECAP Actions.

The participants have been engaged in the SECAP Actions, and the discussion about energy efficiency led to highlight the importance of acting jointly and to be aware of any individual contribution.

All the participants got their pilot project energy saving kit and entered the Consumer Energy Group.

# A.T3.2 ESTABLISHMENT OF A CONSUMER ENERGY GROUP IN THE MUNICIPALITY OF FORLÌ

## D.T3.2.2 Creation of the consumer energy group in Municipality of Forlì

The citizen of Forlì may adhere the Energy Consumer Group by undersigning a form with which they allow the Municipality through FMI to contact them, invite them to workshops and to meet in assembly.

The activities of the group can have the support of the Municipal Energy Help Desk.

Joint activities with effects on everyday life and use of energy.

At date, **65 people are officially members of the ENES-CE Energy Consumer Group**.

# A.T3.2 ESTABLISHMENT OF A CONSUMER ENERGY GROUP IN THE MUNICIPALITY OF FORLÌ

## D.T3.2.3 Definition of the pilot action in Municipality of Forlì

During the revision path from SEAP to SECAP, three possible pilot action have been evaluated:

1. high-efficiency LED Lamps and other equipment for monitoring and controlling the energy consumption at home (e.g. smart meters, thermo-hygrometer, chrono-thermostat, etc.);
2. high-efficiency electrical appliances;
3. E-bikes, bicycles, electrical kick scooter for a less impacting mobility.

The chosen one is the distribution of **100 energy saving kits** for the monitoring and the reduction of the use of the energy at home, consisting in:

- A thermo-hygrometer and CO2 air monitoring device;
- A power and energy plug-in measurer;
- A Luxmeter;
- A high-efficiency LED lamp.

## D.T3.2.3 Definition of the pilot action in Municipality of Forlì

Anybody can request the Energy Saving Kit by the Energy Help Desk Office, in parallel it is a useful way to promote the Energy Consumer Group and engage people in participating to its activities.

Besides the distribution of the Energy Saving Kit, the Municipality of Forlì purchased **535 Solar Toys** to be handed out to any parent who request it at the Energy Help Desk for his/her child, or to be distributed during FMI's educational activities with schools.

## D.T3.3.1 PA1-IT: Implementing the defined pilot actions

The components of the **100 energy saving kits** have been selected, purchased and are now in distribution by the Municipal Energy Help Desk. The kit is handed-out with a manual illustrating the use and the opportunities of saving for each instrument and together with (D.C4.1) ENES-CE cotton bag and pen.

At date, **74 Energy Saving Kits and 353 solar toys have been requested and distributed**. The remaining ones will be consigned upon availability.

# Thanks for your

# Attention
