Pic 1: Battery system in the Arlmühle, PAF

Remote access and control: Data exchange in operation

Pic 2: Control system of the battery system SWP, PAF

# PILOT PROJECT PP08

The battery swarm storage is in operation
(pilot project in the City of Pfaffenhofen)

- The battery swarm storage is in operation The system works correctly at three different locations
  - Customer centre of the municipal utility PAF
  - In the head office of the municipal utility and
  - in a project location
- The data exchange with the central units works
- Billing and legal hurdles are currently being checked/worked on. New legislation in GER (July 2022) will may be / possibly solve the issues
